COURSE OBJECTIVES:

1. Build small empires in this board gaming class that teaches you critical thinking, situation analysis, and strategy using civilization-building, and player inclusive, board games from Germany and Europe. Board gaming has been played since ancient times and Dr Sigvartsen (a former Michigan finalist (he came third) in the International Settlers of Catan tournament) wants to revive this lost interpersonal and critical thinking skill.
2. You will learn how to be a good sport, master in-person social gaming, work collaboratively to build alliances, and make new friends in a screen free environment.
3. We select games that simulate real problem solving, strategy, and real small community building decisions. An alternative strategy and critical thinking class for those who do not like Chess.
